*Fil 'Black' with terrazzo stone*

## DESIGN

*Fil is a grand place for your carefully selected clothing that usually will be forgotten in your wardrobe after time. Made of high quality brass or colored steel, the clothing rack is grounded with a white Carrara marble stone or patterned terrazzo stone. The mix of materials creates a striking contrast and achieves an exciting composition.*

*„Fil“ is the French word for thread and refers to both form and function of this coat hanger; the extremely delicate materiality and the precious textiles that can be held by it.*
